

What you think matters!

We have sent you a questionnaire because we want to find out what you thought of your recent stay in hospital. The survey is being run by your hospital trust and the Care Quality Commission (CQC), who inspect all hospitals in England to make sure care is safe and works well. It is really important we hear from children and young people, because **you are the experts** on what your care was like. By telling us about your stay, we can look at your hospital compared to other hospitals and help improve care.

We will make sure nobody can tell what answers you have given us when we produce results for all hospital trusts in England. This is really important to remember when you decide if you want to take part, as **your hospital will not know what you individually have said**.

We'd really like to understand what **you** think, but if you need help to answer any of the questions then please ask your parent or carer.

Your hospital will not know what you individually have said

You don't have to fill in the questions if you don't want to. If you don't want to, then please hand the questionnaire back to your parent/carer as there are some questions for them to answer. If you don't want to take part, it won't affect how you are cared for in the future.

You are the experts!
