This work was carried out in accordance with the requirements of the international standard for organisations conducting social research (accreditation to ISO27001:2013; certificate number GB10/80275).

Background and methodology

This section includes:

- an introduction to the NHS Patient Survey Programme
- information on the 2024 Children and Young People's Patient Experience Survey
- a description of key terms used in this report
- guidance on how to navigate the report

Background and methodology

The NHS Patient Survey Programme

The NHS Patient Survey Programme (NPSP) collects feedback on adult inpatient care, maternity care, children and young people's inpatient and day services, urgent and emergency care, and community mental health services.

The NPSP is commissioned by the Care Quality Commission (CQC), the independent regulator of health and adult social care in England.

The Children and Young People's Patient Experience Survey has been conducted as part of the NPSP since 2014. The survey was last conducted in 2020 and the 2024 survey marks the transition to a mixed-mode methodology, incorporating both online and paper responses.

The 2024 survey provides insight into the experiences of children and young people (age 0 to 15 years) and supports the CQC in regulating, monitoring, and inspecting acute and specialist NHS trusts in England.

For further details on the programme and results from previous surveys, please refer to the section on further information on this page.

Children and Young People's Patient Experience Survey

The survey was administered by the Survey Coordination Centre (SCC) at Picker Institute. A total of 133,138 patients were invited to participate across 120 NHS trusts. Responses were received from 25,821 respondents (including 12,917 children and young people), an adjusted response rate of 19.6%.

Patients were eligible to participate if they had been admitted to hospital, were aged between 15 days and 15 years old and had been discharged between 1 March 2024 and 31 May 2024. Trusts drew a sample of up to 1,250 patients; however, some trusts with fewer patients did submit a smaller sample size.

The 2024 survey had three questionnaire versions tailored to three age groups, sent based on the child or young person's age at the end of the sampling period (31 May 2024):

- **0-7 questionnaire:** Sent to parents or carers of children aged between 15 days and 7 years. This questionnaire was completed entirely by the parent or carer.
- **8-11 questionnaire:** Sent to parents or carers of children aged 8 to 11 years. This questionnaire

included a section for the child to complete and a separate section for the parent or carer.

- **12-15 questionnaire:** Sent to parents or carers of young people aged 12 to 15 years. This questionnaire included a section for the young person to complete and a separate section for the parent or carer. Those aged 15 years at discharge but who turned 16 years by the end of the sampling period still received this version.

For more information on the sampling criteria for the survey, please refer to the [sampling instructions](#). Fieldwork for the survey (the time during which questionnaires were sent out and returned) took place between August and December 2024.

Further information about the survey

- For published results and for more information on the Children and Young People's Patient Experience Survey, as well as other surveys in the NPSP and guidance for trusts, please visit the [NHS Survey website](#).
- To learn more about the CQC's survey programme, please visit the [CQC website](#).

Key terms used in this report

The 'expected range' technique

This report shows results for your trust for each scored evaluative question in the survey, compared with other trusts that took part. It uses an analysis technique called the 'expected range' to determine if your trust is performing about the same, better or worse compared with most other trusts. This is designed to help understand the performance of individual trusts and identify areas for improvement. More information can be found in the ['How to interpret scoring and benchmarking in this report'](#) pages.

Standardisation

Demographic characteristics, such as age and route of admission, can influence patients' experience of care and the way they report it. Since trusts have differing profiles of patients, this could make fair trust comparisons difficult. To account for this, we 'standardise' the results, which means we apply a weight to individual patient responses to account for differences in demographic profiles between trusts.

For each trust, results have been standardised by the route of admission (emergency or elective), length of stay (no overnight stay or one or more overnight stays) and the age of respondents. This

ensures that the trust results reflect the 'national' distribution of these factors (based on all respondents to the survey).

This helps ensure that no trust will appear better or worse than another because of its profile and enables a fairer and more useful comparison of results across trusts. In most cases this standardisation will not have a large impact on trust results.

Scoring

For selected questions in the survey, the individual (standardised) responses are converted into scores, typically 0, 5, or 10. A score of 10 represents the best possible result and a score of 0 the worst. The higher the score for each question, the better the trust is performing.

Some questions are descriptive (e.g., p27) or designed to filter respondents based on their relevance to subsequent questions (e.g., p59). While these questions are generally not scored, some exceptions apply. Please refer to the [scored questionnaire](#) for further details. Section scores are calculated as the arithmetic mean of question scores for the section after weighting is applied. More information can be found in the ['How questions are](#)

[scored](#)' slide.

National average

The 'national average' mentioned in this report is the arithmetic mean of all trusts' scores after weighting is applied.

Suppressed data

- **Scored questions:** No score will be displayed if there are fewer than 30 respondents with data for a scored question.
- **Demographic data:** No data will be displayed if there are fewer than 20 respondents with data for a demographic category (such as gender or ethnicity).

Further information about the methods

For further information about the statistical methods used in this report, please refer to the [survey technical document](#) which is on the 'Analysis and Reporting' section of the 2024 Children and Young People's Patient Experience Survey webpage on the NHS surveys website.

Using the survey results

Navigating this report

This report is split into four sections:

- **Background and methodology** – provides information about the survey programme, how the survey is run, and how to interpret the data.
- **Headline results** – includes key trust-level findings relating to the patients who took part in the survey, benchmarking, and top and bottom scores. This section provides an overview of results for your trust, identifying areas where your organisation performs better than the average and where you may wish to focus improvement activities.
- **Scoring and benchmarking** – shows how your trust scored for each evaluative question in the survey compared with other participating trusts, using the 'expected range' analysis technique. This allows you to see the range of scores achieved and compare yourself with the other organisations that took part in the survey. Scoring and benchmarking can provide you with an indication of where you perform better than the average, and what you should aim for in areas

where you may wish to improve.

- **Comparison to other trusts** – Shows questions where your trust has performed much better, better, somewhat better, somewhat worse, worse, or much worse compared with all other trusts.

How to interpret the graphs in this report

There are several types of graphs in this report that show how the score for your trust compares to the scores achieved by all trusts that took part in the survey.

The two chart types used in the section 'Scoring and benchmarking' use the 'expected range' technique to show results. For information on how to interpret these graphs, please refer to the ['How to interpret scoring and benchmarking in this report'](#) slides.

Other data sources

More information is available about the following topics at their respective websites, listed below:

- Full national results; technical document:

[Children and young people's survey 2024 - Care Quality Commission](#)

- National and trust-level data for all trusts who took part in the 2024 Children and Young People's Patient Experience Survey <https://nhssurveys.org/surveys/survey/01-children-patient-experience/>. Full details of the methodology for the survey, instructions for trusts and contractors to carry out the survey, and the survey development report can also be found on the NHS Surveys website.
- Information on the NHS Patient Survey Programme, including results from other surveys: www.cqc.org.uk/content/surveys
- Information about how the CQC monitors hospitals: <https://www.cqc.org.uk/what-we-do/how-we-use-information/using-data-monitor-services>

Headline results

This section includes:

- information about your trust population and sample
- an overview of benchmarking for your trust
- the best and worst scores for your trust

Who took part in the survey?

This slide is included to help you interpret responses and to provide information about the population of patients who took part in the survey.

1241 invited to take part

Summary of findings for your trust

Comparison with other trusts

The **number of questions** at which your trust has performed better, worse, or about the same compared with all other trusts.

For a breakdown of the questions where your trust has performed better or worse compared with all other trusts, please refer to the section [How to interpret scoring and benchmarking in this report](#).

Best and worst performance relative to the national average: children and young people's questions

These five questions are calculated by comparing your trust's results to the national average.

- **Top five scores:** These are the five results for your trust that are highest compared with the national average. If none of the results for your trust are above the national average, then the results that are closest to the national average have been chosen, meaning a trust's best performance may be worse than the national average.
- **Bottom five scores:** These are the five results for your trust that are lowest compared with the national average. If none of the results for your trust are below the national average, then the results that are closest to the national average have been chosen, meaning a trust's worst performance may be better than the national average.

Top five scores (compared with national average)

■ Your trust score ■ National average 0 2 4 6 8 10

Section 8 Operations and procedures

c22. Before the operations or procedures, how well did staff explain what would be done?

9.1

Section 5 Hospital food

c6. Were you able to get hospital food when it wasn't a mealtime?

6.1

Section 3 Talking to hospital staff

c18. Did staff try to help you with your fears or worries?

8.8

Section 6 Facilities

c1. If you used the hospital Wi-Fi, was it good enough to do what you wanted?

6.4

Section 4 Being looked after in hospital

c11. How friendly were the staff looking after you?

9.2

Bottom five scores (compared with national average)

■ Your trust score ■ National average 0 2 4 6 8 10

Section 4 Being looked after in hospital

c7. Did staff play with you or do any activities with you while you were in hospital? / Did staff give you any activities to do while you were in hospital?

3.3

Section 1 The waiting area

c20_6. Did any of the following bother you when you were in the waiting area? Nothing bothered me

1.6

Section 5 Hospital food

c5. Was there enough choice of hospital food?

4.5

Section 1 The waiting area

c20_3. Did any of the following bother you when you were in the waiting area? Not having enough to do

6.1

Section 1 The waiting area

c20_1. Did any of the following bother you when you were in the waiting area? How long you had to wait

3.9

NHS Children and Young People's Patient Experience Survey

Results for Great Western Hospitals NHS Foundation Trust

Where children and young people reported their experience **is best**

- ✓ **Operations and procedures:** Staff providing children and young people with clear explanations before operations or procedures
- ✓ **Hospital food:** Young people having access to hospital food outside mealtimes
- ✓ **Talking to hospital staff:** Staff helping children and young people with their fears or worries
- ✓ **Facilities:** Children and young people finding the hospital Wi-Fi meets their needs
- ✓ **Being looked after in hospital:** Staff showing friendliness when looking after children and young people

Where children and young people reported their experience **could improve**

- **Being looked after in hospital:** Staff playing or providing activities for children and young people
- **The waiting area:** Children and young people not feeling bothered by anything in waiting areas
- **Hospital food:** Young people having enough choice of hospital food
- **The waiting area:** Children and young people having enough to do in waiting areas
- **The waiting area:** Children and young people experiencing reasonable waiting times in waiting areas

These questions are based on responses from **children and young people** and are calculated by comparing your trust's results to the national average. "Where patient experience is best": These are the five results for your trust that are highest compared with the national average. "Where patient experience could improve": These are the five results for your trust that are lowest compared with the national average.

This survey looked at the experiences of children and young people who were discharged from an NHS acute hospital between 1 March 2024 and 31 May 2024. Between August and December 2024, a questionnaire was sent to 1241 recent patients. Responses were received from 260 patients at this trust. If you have any questions about the survey and our results, please contact [INSERT TRUST CONTACT DETAILS].

Best and worst performance relative to the national average: parents and carers' questions

These five questions are calculated by comparing your trust's results to the national average.

- **Top five scores:** These are the five results for your trust that are highest compared with the national average. If none of the results for your trust are above the national average, then the results that are closest to the national average have been chosen, meaning a trust's best performance may be worse than the national average.
- **Bottom five scores:** These are the five results for your trust that are lowest compared with the national average. If none of the results for your trust are below the national average, then the results that are closest to the national average have been chosen, meaning a trust's worst performance may be better than the national average.

Top five scores (compared with national average)

■ Your trust score ■ National average 0 2 4 6 8 10

Section 1 The waiting area

p30_3. Did any of the following bother your child while you were in the waiting area? Not having enough to do

9.4

Section 1 The waiting area

p30_4. Did any of the following bother your child while you were in the waiting area? Not having enough to eat or drink

9.0

Section 3 Talking to hospital staff

p36. Did staff caring for and treating your child introduce themselves?

9.2

Section 5 Hospital food

p55. Was hospital food available for your child outside of mealtimes?

5.5

Section 5 Hospital food

p54. Was there enough choice of hospital food for your child?

6.5

Bottom five scores (compared with national average)

■ Your trust score ■ National average 0 2 4 6 8 10

Section 1 The waiting area

p30_5. Did any of the following bother your child while you were in the waiting area? Not knowing what was happening

6.9

Section 4 Being looked after in hospital

p43. Were staff available when your child needed attention?

7.5

Section 3 Talking to hospital staff

p42. Did different staff give you conflicting information?

7.1

Section 6 Facilities

p60. How would you rate the facilities for parents or carers staying overnight?

6.4

Section 4 Being looked after in hospital

p51. Did staff caring for and treating your child work well together?

7.9

NHS Children and Young People's Patient Experience Survey

Results for Great Western Hospitals NHS Foundation Trust

Where **parents and carers** reported experience **is best**

- ✓ **The waiting area:** Children having enough to do in waiting areas
- ✓ **The waiting area:** Children having enough food and drink in waiting areas
- ✓ **Talking to hospital staff:** Staff introducing themselves when caring for children
- ✓ **Hospital food:** Children having access to hospital food outside of mealtimes
- ✓ **Hospital food:** Children having enough choice of hospital food

Where **parents and carers** reported experience **could improve**

- **The waiting area:** Children being kept informed while in waiting areas
- **Being looked after in hospital:** Staff being available when children and young people need attention
- **Talking to hospital staff:** Staff providing consistent information about care
- **Facilities:** Good facilities being available for parents / carers staying overnight
- **Being looked after in hospital:** Staff working well together when caring for children and young people

These questions are based on responses from **parents and carers** and are calculated by comparing your trust's results to the national average. "Where patient experience is best": These are the five results for your trust that are highest compared with the national average. "Where patient experience could improve": These are the five results for your trust that are lowest compared with the national average.

This survey looked at the experiences of children and young people who were discharged from an NHS acute hospital between 1 March 2024 and 31 May 2024. Between August and December 2024, a questionnaire was sent to 1241 recent patients. Responses were received from 260 patients at this trust. If you have any questions about the survey and our results, please contact [INSERT TRUST CONTACT DETAILS].

Scoring and benchmarking

This section includes:

- how your trust scored for each evaluative question in the survey, compared with other trusts that took part
- an analysis technique called the 'expected range' to determine if your trust is performing about the same, better or worse compared with most other trusts

Please note: If data is missing, this is due to a low number of responses.

How questions are scored

Each evaluative question is scored on a scale from 0 to 10. The scores represent the extent to which the patient's experience could be improved. A score of 0 is assigned to all responses that reflect considerable scope for improvement, whereas a score of 10 refers to the most positive patient experience possible. Where a number of options lay between the negative and positive responses, they are placed at equal intervals along the scale. Where options were provided that did not have any bearing on the trust's performance in terms of patient experience, the responses are classified as "not applicable" and a score is not given. Similarly, where respondents stated they could not remember or did not know the answer to a question, a score is not given.

Example of how questions are scored

The following provides an example for the scoring system applied for each respondent. For question c13 "Did staff talk to you in a way you understood?":

- The answer code "Yes, always" would be given a score of 10, as this refers to the most positive patient experience possible.
- The answer code "Yes, sometimes" would be given a score of 5, as it is placed at an equal interval along the scale.
- The answer code "No" would be given a score of 0, as this response reflects considerable scope for improvement.
- The answer code "Don't know / can't remember" would not be scored, as it does not have a clear bearing on the trust's performance in terms of patient experience.

Calculating the trust score for each question

The weighted mean score for each trust, for each question, is calculated by dividing the sum of the weighted scores for a question by the weighted sum of all eligible respondents to the question for each trust. An example of this is provided in the [survey technical document](#).

Calculating the section score

An arithmetic mean of each trust's question scores is taken to provide a score for each section.

How to interpret scoring and benchmarking in this report

The charts in the 'scoring and benchmarking' section show how the score for your trust compares to the range of scores achieved by all trusts taking part in the survey. The black line shows the score for your trust. The graphs are divided into seven possible sections, comparing the score for your trust to most other trusts in the survey:

- If your trust's score lies in the **dark green section** of the graph, its result is 'Much better than expected'.
- If your trust's score lies in the **mid-green section** of the graph, its result is 'Better than expected'.
- If your trust's score lies in the **light green section** of the graph, its result is 'Somewhat better than expected'.
- If your trust's score lies in the **grey section** of the graph, its result is 'About the same'.
- If your trust's score lies in the **yellow section** of the graph, its result is 'Somewhat worse than expected'.
- If your trust's score lies in the **light orange section** of the graph, its result is 'Worse than expected'.
- If your trust's score lies in the **dark orange section** of the graph, its result is 'Much worse than expected'.

These groupings are based on a rigorous statistical analysis of the data termed the 'expected range' technique.

How to interpret scoring and benchmarking in this report (continued)

The 'much better than expected', 'better than expected', 'somewhat better than expected', 'about the same', 'somewhat worse than expected', 'worse than expected' and 'much worse than expected' categories are based on an analysis technique called the 'expected range'. Expected range determines the range within which a trust's score could fall without differing significantly from the average, taking into account the number of respondents for each trust, to indicate whether the trust has performed significantly above or below what would be expected.

If it is within this expected range, we say that the trust's performance is 'about the same' as other trusts. Where a trust is identified as performing 'better' or 'worse' than the majority of other trusts, the result is unlikely to have occurred by chance.

The question score charts show the trust scores compared to the minimum and maximum scores achieved by any trust. In some cases, this minimum or maximum limit will mean that one or more of the bands are not visible – because the range of other bands is broad enough to include the highest or lowest score achieved by a trust this year. This could be because there were few respondents, meaning the confidence intervals around your data are slightly larger, or because there was limited variation between trusts for this question this year.

In some cases, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust. This occurs as the bandings are calculated through standard error rather than standard deviation. Standard error takes into account the number of responses achieved by a trust, and therefore the banding may differ for a trust with a low number of responses.

Additional information on the 'expected range' analysis technique can be found in the survey technical document on the [NHS Surveys website](#).

Scoring and benchmarking

Section 1: The waiting area

Please note: If data is missing, this is due to a low number of responses.

The waiting area – Parents and carers’ reports (0 to 7 years)

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the ‘expected range’ analysis technique used, a trust could be categorised as ‘about the same’ whilst having a lower score than a ‘worse than expected’ trust, or categorised as ‘about the same’ whilst having a higher score than a ‘better than expected’ trust.

Your trust section score = 7.5 About the same

Each vertical line represents an individual NHS trust
Trust score is not shown when there are fewer than 30 respondents

Comparison with other trusts within your region

Trusts with the highest scores

Royal Cornwall Hospitals NHS Trust	8.4
University Hospitals Bristol and Weston NHS Foundation Trust	8.1
Somerset NHS Foundation Trust	8.0
University Hospitals Dorset NHS Foundation Trust	7.8
