Section 2. Organising care

Section 3. Planning care

Section 4. Reviewing care

Section 5. Crisis care

Section 6. Medicines

Section 7. NHS Talking Therapies

Section 8. Support and wellbeing

Section 9. Feedback

Section 10. Overall views of care and services

Section 11. Overall experience

Section 12. Responsive care

Section 1. Health and social care workers

Section 2. Organising care

Section 3. Planning care

Section 4. Reviewing care

Section 5. Crisis care

Section 6. Medicines

Section 7. NHS Talking Therapies

Section 8. Support and wellbeing

Section 9. Feedback

Section 10. Overall views of care and services

Section 11. Overall experience

This work was carried out in accordance with the requirements of the international standard for organisations conducting social research (accreditation to ISO27001:2013; certificate number GB10/80275).

# Background and methodology

This section includes:

- an explanation of the NHS Patient Survey Programme
- information on the Community Mental Health Survey
- a description of key terms used in this report
- navigating the report

# Background and methodology

## The NHS Patient Survey Programme

The NHS Patient Survey Programme (NPSP) collects feedback on adult inpatient care, maternity care, children and young people's inpatient and day services, urgent and emergency care, and community mental health services.

The NPSP is commissioned by the Care Quality Commission (CQC); the independent regulator of health and adult social care in England.

As part of the NPSP, the Community Mental Health Survey has been conducted almost every year since 2004. The CQC use the results from the survey in its assessment of mental health trusts in England.

To find out more about the survey programme and to see the results from previous surveys, please refer to the section on further information on this page.

## Community Mental Health Survey

The survey was administered by the Survey Coordination Centre for Existing Methods (SCCEM) at Picker Institute.

The 2022 survey of people who use community

mental health services involved 53 providers of NHS community mental health services in England. We received responses from 13,418 people, a response rate of 20.9%.

People aged 18 and over were eligible for the survey if they were receiving care or treatment for a mental health condition and were seen face-to-face at the trust, via video conference or telephone between 1 September 2021 and 30 November 2021. For more information on the sampling criteria for the survey, please refer to the sampling instructions detailed in the 'Further information' section. Fieldwork for the survey (the time during which questionnaires were sent out and returned) took place between February and June 2022.

## Trend data

The Community Mental Health Survey is comparable back to the 2014 survey. Trend data is presented in this report for questions that have been asked in previous survey years.

## Further information about the survey

- For published results for other surveys in the NPSP, and for information to help trusts implement the surveys across the NPSP, please visit the [NHS Surveys website](#).
- To learn more about the CQC's survey programme, please visit the [CQC website](#).

# Key terms used in this report

## The 'expected range' technique

This report shows how your trust scored for each evaluative question in the survey, compared with other trusts that took part. It uses an analysis technique called the 'expected range' to determine if your trust is performing about the same, better or worse compared with most other trusts. This is designed to help understand the performance of individual trusts and identify areas for improvement. More information can be found in the [Appendix](#).

## Standardisation

Demographic characteristics, such as age and sex, can influence service users' experience of care and the way they report it. For example, research shows that older people report more positive experiences of care than younger people. Since trusts have differing profiles of service users, this could make fair trust comparisons difficult. To account for this, we 'standardise' the results, which means we apply a weight to individual service user responses to account for differences in demographic

profile between trusts. For each trust, results have been standardised by the age and sex of respondents to reflect the 'national' age-sex type distribution (based on all respondents to the survey).

This helps ensure that no trust will appear better or worse than another because of its profile, and enables a fairer and more useful comparison of results across trusts. In most cases this standardisation will not have a large impact on trust results.

## Scoring

For each question in the survey, the individual (standardised) responses are converted into scores on a scale of 0 to 10. A score of 10 represents the best possible result and a score of 0 the worst. The higher the score for each question, the better the trust is performing. Only evaluative questions in the questionnaire are scored. Some questions are descriptive (for example Q1) and others are 'routing questions', which are designed to filter out

respondents to whom the following questions do not apply (for example Q23). These questions are not scored. Section scoring is computed as the arithmetic mean of question scores for the section after weighting is applied.

## National average

The 'national average' mentioned in this report is the arithmetic mean of all trusts' scores after weighting is applied.

## Suppressed data

If fewer than 30 respondents have answered a question, no score will be displayed for that question (or the corresponding section the question contributes to).

## Further information about the methods

For further information about the statistical methods used in this report, please refer to the [survey technical document](#).

# Using the survey results

## Navigating this report

This report is split into five sections:

- **Background and methodology** – provides information about the survey programme, how the survey is run, and how to interpret the data.
- **Headline results** – includes key trust-level findings relating to the service users who took part in the survey, benchmarking, and top and bottom scores. This section provides an overview of results for your trust, identifying areas where your organisation performs better than the average and where you may wish to focus improvement activities.
- **Benchmarking** – shows how your trust scored for each evaluative question in the survey, compared with other trusts that took part; using the ‘expected range’ analysis technique. This allows you to see the range of scores achieved and compare yourself with the other organisations that took part in the survey. Benchmarking can provide you with an indication of where you perform better than the average, and what you should aim for in areas where you may wish to improve.

- **Change over time** – displays your trust score for each survey year. Where available, trend data will be shown from 2014 to 2022. Questions are displayed in a line chart with the trust mean plotted alongside the national average. Statistical significance testing is also shown between survey years 2022 vs 2021. This section highlights areas your trust has improved on or declined in over time.
- **Appendix** – includes additional data for your trust; further information on the survey methodology; and interpretation of graphs in this report.

## How to interpret the graphs in this report

There are several types of graphs in this report which show how the score for your trust compares to the scores achieved by all trusts that took part in the survey. Additionally, line charts show your trust’s trend data over time.

The two chart types used in the section ‘Benchmarking’ use the ‘expected range’ technique to show results. For information on how to interpret these graphs, please refer to the [Appendix](#).

## Other data sources

More information is available about the following topics at their respective websites, listed below:

- Full national results; technical document: <http://www.cqc.org.uk/cmhsurvey>
- National and trust-level data for all trusts who took part in the Community Mental Health Survey 2022 <https://nhssurveys.org/surveys/survey/05-community-mental-health/>. Full details of the methodology for the survey, instructions for trusts and contractors to carry out the survey, and the survey development report can also be found on the NHS Surveys website.
- Information on the NHS Patient Survey Programme, including results from other surveys: [www.cqc.org.uk/content/surveys](http://www.cqc.org.uk/content/surveys)
- Information about how the CQC monitors hospitals: <https://www.cqc.org.uk/what-we-do/how-we-use-information/using-data-monitor-services>

# Headline results

This section includes:

- information about your trust population
- an overview of benchmarking for your trust
- the best and worst scores for your trust

# Who took part in the survey?

This slide is included to help you interpret responses and to provide information about the population of service users who took part in the survey.

**1250** invited to take part

**293** completed

**24%** response rate

21% average response rate for all trusts

28% response rate for your trust last year

## AGE

## ETHNICITY

## LONG-TERM CONDITIONS

**92%** of service users have a **physical or mental health condition or illness that has lasted or is expected to last for 12 months or more.**

Number of long-term conditions reported:

## SEX

At birth were you registered as...

**1%** of service users said their **gender is different from the sex they were registered with at birth.**

## RELIGION

# Summary of findings for your trust

## Comparison with other trusts

The **number of questions** at which your trust has performed better, worse, or about the same compared with all other trusts.

## Comparison with last year's results

The **number of questions** at which your trust has performed statistically significantly better, significantly worse, or no different than your result from the previous year, 2022 vs 2021.

For a breakdown of the questions where your trust has performed better or worse compared with all other trusts, please refer to the appendix section [“your trust has performed much worse”](#), [“your trust has performed worse”](#), [“your trust has performed somewhat worse”](#), [“your trust has performed somewhat better”](#), [“your trust has performed better”](#), [“your trust has performed much better”](#).

# Best and worst performance relative to the national average

These five questions are calculated by comparing your trust's results to the national average.

- **Top five scores:** These are the five results for your trust that are highest compared with the national average. If none of the results for your trust are above the national average, then the results that are closest to the national average have been chosen, meaning a trust's best performance may be worse than the national average.
- **Bottom five scores:** These are the five results for your trust that are lowest compared with the national average. If none of the results for your trust are below the national average, then the results that are closest to the national average have been chosen, meaning a trust's worst performance may be better than the national average.

## Top five scores (compared with national average)

## Bottom five scores (compared with national average)

# Benchmarking

This section includes:

- how your trust scored for each evaluative question in the survey, compared with other trusts that took part.
- an analysis technique called the 'expected range' to determine if your trust is performing about the same, better or worse compared with most other trusts.

# Section 1. Health and social care workers

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 8.1 Much better than expected**

# Section 1. Health and social care workers (continued)

## Question scores

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
275	8.4	7.1	6.2	8.4
272	7.9	6.8	5.9	7.9
267	8.0	6.9	5.8	8.0

## Section 2. Organising care

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 9.0 Much better than expected**

## Section 2. Organising care (continued)

### Question scores

Much better than expected

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
255	8.7	7.1	6.0	8.7

Much better than expected

184	9.0	8.2	7.6	9.0
-----	-----	-----	-----	-----

About the same

187	9.8	9.6	9.0	10.0
-----	-----	-----	-----	------

Much better than expected

174	8.6	7.9	6.6	8.7
-----	-----	-----	-----	-----

## Section 3. Planning care

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 8.0 Much better than expected**

## Section 3. Planning care (continued)

### Question scores

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
263	7.6	6.1	5.0	7.6
228	8.3	7.4	6.7	8.3
222	8.0	7.0	6.3	8.0

## Section 4. Reviewing care

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 8.1 Much better than expected**

## Section 4. Reviewing care (continued)

### Question scores

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
198	7.6	6.2	4.8	7.6

Better than expected

148	8.7	7.9	6.7	8.9
-----	-----	-----	-----	-----

Better than expected

## Section 5. Crisis care

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 7.6 Much better than expected**

# Section 5. Crisis care (continued)

## Question scores

Q20. Would you know who to contact out of office hours within the NHS if you had a crisis? This should be a person or a team within NHS mental health services.

Much better than expected

Number of respondents	Your trust	All trusts in England		
		National average	Lowest score	Highest score
255	8.6	7.1	6.2	8.6

Q21. Thinking about the last time you contacted this person or team, did you get the help you needed?

Better than expected

169	7.5	6.5	5.1	7.9
-----	-----	-----	-----	-----

Q22. How do you feel about the length of time it took you to get through to this person or team?

About the same

148	6.7	6.0	4.9	7.1
-----	-----	-----	-----	-----

## Section 6. Medicines

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 8.1 Much better than expected**

# Section 6. Medicines (continued)

## Question scores

Number of respondents	Your trust	All trusts in England		
		National average	Lowest score	Highest score
210	8.6	7.8	7.2	8.6
205	7.0	5.9	5.0	7.0
157	8.7	7.5	6.1	8.7

## Section 7. NHS Talking Therapies

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 7.9 About the same**

# Section 7. NHS Talking Therapies (continued)

## Question scores

Q29. Were these NHS talking therapies explained to you in a way you could understand?

About the same

Q30. Were you involved as much as you wanted to be in deciding what NHS talking therapies to use?

Somewhat better than expected

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
85	8.1	8.1	6.8	8.8

81	7.7	7.0	6.1	8.2
----	-----	-----	-----	-----

# Section 8. Support and wellbeing

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 6.4 Much better than expected**

# Section 8. Support and wellbeing (continued)

## Question scores

Number of respondents	Your trust	All trusts in England		
		National average	Lowest score	Highest score
151	6.8	4.7	3.3	6.8

Much better than expected

149	5.3	3.8	2.7	5.3
-----	-----	-----	-----	-----

Better than expected

64	5.7	3.9	2.6	5.7
----	-----	-----	-----	-----

Better than expected

220	8.1	6.6	5.5	8.1
-----	-----	-----	-----	-----

Much better than expected

## Section 9. Feedback

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 3.6 Much better than expected**

# Section 9. Feedback (continued)

## Question scores

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
235	3.6	1.9	1.0	3.6

Much better than expected

## Section 10. Overall views of care and services

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 8.3 Much better than expected**

# Section 10. Overall views of care and services (continued)

## Question scores

		All trusts in England		
Number of respondents	Your trust	National average	Lowest score	Highest score
278	7.5	5.8	4.7	7.5

## Section 11. Overall experience

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 7.8 Much better than expected**

# Section 11. Overall experience (continued)

## Question scores

Number of respondents	Your trust	All trusts in England		
		National average	Lowest score	Highest score
264	7.8	6.7	6.1	7.8

Much better than expected

## Section 12. Responsive care

This shows the range of section scores for all NHS trusts. The colour of the line denotes whether a trust has performed better, worse, or about the same compared with all other trusts (as detailed in the legend). The result for your trust is shown in black. Please note, as a result of the 'expected range' analysis technique used, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

**Your trust section score = 8.7 Much better than expected**

# Section 12. Responsive care

## Question scores

Q4. In the last 12 months, have you and someone from NHS mental health services agreed how your care and treatment will be delivered? (i.e. in person, via video call or telephone).

■ Much better than expected

Q6. Have you received your care and treatment in the way you agreed?

■ Somewhat better than expected

Number of respondents	Your trust	All trusts in England		
		National average	Lowest score	Highest score
284	8.6	7.2	6.2	8.6

233	8.7	8.2	7.4	8.8
-----	-----	-----	-----	-----

# Change over time

This section includes:

- a comparison to previous survey years scores for your trust for each question, including:
  - your trust's 2022 score compared with its scores from 2014 to 2021.

**Please note;**

- Section 3 planning care, appears missing from the change over time section as the questions that comprise the section score are non comparable to previous survey years and therefore do not display trends.
- If data is missing for a survey year, this is due to a low number of responses, or because the trust data was not included in the survey that year, due to sampling errors or ineligibility.

# Section 1. Health and social care workers

## Question scores

Significant change 2022 vs 2021

Increase

Answered by all. Respondents who stated that they didn't know / couldn't remember have been excluded.  
 Number of respondents: 2014: 214; 2015: 219; 2016: 233; 2017: 225; 2018: 240; 2019: 260; 2020: 299; 2021: 327; 2022: 275

Significant change 2022 vs 2021

No change

Answered by all. Respondents who stated that they didn't know / couldn't remember have been excluded.  
 Number of respondents: 2014: 209; 2015: 207; 2016: 229; 2017: 217; 2018: 239; 2019: 257; 2020: 293; 2021: 320; 2022: 272

# Section 1. Health and social care workers

## Question scores

Answered by all. Respondents who stated that they didn't know / couldn't remember or that they had no treatment prior to this have been excluded.

Number of respondents: 2020: 277; 2021: 304; 2022: 267

## Section 2. Organising care

### Question scores

Significant change 2022 vs 2021

No change

Answered by all. Respondents who stated that they weren't sure have been excluded.  
Number of respondents: 2014: 178; 2015: 190; 2016: 211; 2017: 199; 2018: 220; 2019: 224; 2020: 257; 2021: 277; 2022: 255

Significant change 2022 vs 2021

Increase

Answered by those who have been told who is in charge of organising their care and services, and the person in charge is not a GP.  
Number of respondents: 2018: 170; 2019: 166; 2020: 170; 2021: 213; 2022: 184

## Section 2. Organising care

### Question scores

**Significant change 2022 vs 2021**

No change

Answered by those who have been told who is in charge of organising their care and services, and the person in charge is not a GP. Respondents who stated that they weren't sure have been excluded.

Number of respondents: 2018: 164; 2019: 166; 2020: 166; 2021: 210; 2022: 187

# Section 4. Reviewing care

## Question scores

**Significant change 2022 vs 2021**

No change

Answered by those who felt that decisions were made together with the person they saw during this discussion. Respondents who stated that they didn't know / couldn't remember or did not want to be involved in making decisions have been excluded.

Number of respondents: 2020: 161; 2021: 185; 2022: 148

# Section 5. Crisis Care

## Question scores

**Significant change 2022 vs 2021**

No change

Answered by all. Respondents who stated that they weren't sure have been excluded.  
Number of respondents: 2020: 279; 2021: 298; 2022: 255

# Section 6. Medicines

## Question scores

Significant change 2022 vs 2021

No change

Answered by those who have been receiving any medicines in the last 12 months for their mental health needs. Respondents who stated that they didn't know / couldn't remember have been excluded.

Number of respondents: 2019: 211; 2020: 218; 2021: 266; 2022: 210

Significant change 2022 vs 2021

No change

Answered by those who have been receiving any medicines in the last 12 months for their mental health needs. Respondents who stated that they didn't know / couldn't remember have been excluded.

Number of respondents: 2019: 208; 2020: 215; 2021: 255; 2022: 205

# Section 6. Medicines

## Question scores

**Significant change 2022 vs 2021**

No change

Answered by those who have been receiving any medicines for 12 months or longer for their mental health needs. Respondents who stated that they didn't know / couldn't remember have been excluded. Number of respondents: 2014: 140; 2015: 144; 2016: 141; 2017: 145; 2018: 156; 2019: 161; 2020: 166; 2021: 207; 2022: 157

# Section 7. NHS Talking Therapies

## Question scores

Significant change 2022 vs 2021

No change

Answered by those who have received any NHS talking therapies in the last 12 months for their mental health needs. Respondents who stated that no explanation was needed have been excluded.  
Number of respondents: 2018: 74; 2019: 80; 2020: 98; 2021: 96; 2022: 85

Significant change 2022 vs 2021

No change

Answered by those who have received any NHS talking therapies in the last 12 months for their mental health needs. Respondents who stated that they didn't know / couldn't remember or did not want to be involved have been excluded.  
Number of respondents: 2018: 72; 2019: 78; 2020: 95; 2021: 90; 2022: 81

# Section 8. Support and wellbeing

## Question scores

Significant change 2022 vs 2021

Increase

Answered by all. Respondents who stated that they have support and did not need NHS mental health services to provide it, do not need support for this, or do not have physical health needs have been excluded. Number of respondents: 2020: 142; 2021: 183; 2022: 151

Significant change 2022 vs 2021

Increase

Answered by all. Respondents who stated that they have support and did not need help / advice to find it, or do not need support for this have been excluded. Number of respondents: 2014: 115; 2015: 104; 2016: 106; 2017: 100; 2018: 129; 2019: 125; 2020: 159; 2021: 177; 2022: 149

# Section 8. Support and wellbeing

## Question scores

Significant change 2022 vs 2021

No change

Answered by all. Respondents who stated that they have support and did not need help / advice to find it, do not need support for this, or are not currently in or seeking work have been excluded.  
Number of respondents: 2020: 66; 2021: 67; 2022: 64

Significant change 2022 vs 2021

Increase

Answered by all. Respondents who stated that their friends or family did not want to be involved, did not want their friends or family to be involved, or that this does not apply to them have been excluded.  
Number of respondents: 2014: 160; 2015: 156; 2016: 177; 2017: 176; 2018: 179; 2019: 203; 2020: 236; 2021: 249; 2022: 220

# Section 9. Feedback

## Question scores

**Significant change 2022 vs 2021**

No change

Answered by all. Respondents who stated that they weren't sure have been excluded.  
Number of respondents: 2019: 213; 2020: 254; 2021: 263; 2022: 235

# Section 10. Overall views of care and services

## Question scores

Significant change 2022 vs 2021

Increase

Answered by all. Respondents who stated that they didn't know have been excluded.  
Number of respondents: 2014: 212; 2015: 215; 2016: 238; 2017: 225; 2018: 242; 2019: 258; 2020: 295; 2021: 329; 2022: 278

Significant change 2022 vs 2021

No change

Answered by all.  
Number of respondents: 2014: 216; 2015: 228; 2016: 245; 2017: 225; 2018: 240; 2019: 260; 2020: 302; 2021: 331; 2022: 281

# Section 11. Overall...

## Question scores

No change

Answered by all. Number of respondents: 2014: 212; 2015: 215; 2016: 231; 2017: 210; 2018: 231; 2019: 249; 2020: 285; 2021: 319; 2022: 264

# Appendix

# Comparison to other trusts: where your trust has performed much better

The questions at which your trust has performed much better when compared with all other trusts are listed below. The questions where your trust has performed about the same compared with all other trusts have not been listed.

## Much better than expected

- Q3. In the last 12 months, do you feel you have seen NHS mental health services often enough for your needs? (This includes contact in person, via video call and telephone).
- Q4. In the last 12 months, have you and someone from NHS mental health services agreed how your care and treatment would be delivered? (i.e. in person, via video call or telephone).
- Q7. Were you given enough time to discuss your needs and treatment?
- Q8. Did the person or people you saw understand how your mental health needs affect other areas of your life? (This includes contact in person, via video call and telephone).
- Q9. Did the person or people you saw appear to be aware of your treatment history? (This includes contact in person, via video call and telephone).
- Q10. Have you been told who is in charge of organising your care and services? (This person can be anyone providing your care, and may be called a “care coordinator” or “lead professional”).
- Q12. How well does this person organise the care and services you need?
- Q14. Thinking about the last time you contacted this person, did you get the help you needed?
- Q15. Have you and someone from NHS mental health services decided what care you will receive? (This may be called a careplan).
- Q16. Were you involved as much as you wanted to be in deciding what care you will receive?
- Q17. Did decisions on what care you will receive take into account your needs in other areas of your life?
- Q20. Would you know who to contact out of office hours within the NHS if you had a crisis? This should be a person or a team within NHS mental health services.
- Q24. Has the purpose of your medicines ever been discussed with you?
- Q33. In the last 12 months, did NHS mental health services support you with your physical health needs (this might be an injury, a disability, or a condition such as diabetes, epilepsy, etc)?
- Q36. Have NHS mental health services involved a member of your family or someone else close to you as much as you would like?
- Q37. Overall...
- Q38. Overall, in the last 12 months, did you feel that you were treated with respect and dignity by NHS mental health services?
- Q39. Aside from this questionnaire, in the last 12 months, have you been asked by NHS mental health services to give your views on the quality of your care?

## Comparison to other trusts: where your trust has performed better

The questions at which your trust has performed better than compared with all other trusts are listed below.  
The questions where your trust has performed about the same compared with all other trusts have not been listed.

### Better than expected

- Q18. In the last 12 months, have you had a care review meeting with someone from NHS mental health services to discuss how your care is working?
- Q19. Did you feel that decisions were made together by you and the person you saw during this discussion? (This includes contact in person, via video call and telephone).
- Q21. Thinking about the last time you contacted this person or team, did you get the help you needed?
- Q25. Have the possible side effects of your medicines ever been discussed with you?
- Q27. In the last 12 months, has an NHS mental health worker checked with you about how you are getting on with your medicines? (That is, have your medicines been reviewed?).
- Q34. In the last 12 months, did NHS mental health services give you any help or advice with finding support for financial advice or benefits?
- Q35. In the last 12 months, did NHS mental health services give you any help or advice with finding support for finding or keeping work (paid or voluntary)?

# Comparison to other trusts: where your trust has performed somewhat better

The questions at which your trust has performed somewhat better when compared with all other trusts are listed below. The questions where your trust has performed about the same compared with all other trusts have not been listed.

## Somewhat better than expected

- Q6. Have you received your care and treatment in the way you agreed?
- Q30. Were you involved as much as you wanted to be in deciding what NHS talking therapies to use?

## Comparison to other trusts: where your trust has performed somewhat worse

The questions at which your trust has performed somewhat worse when compared with all other trusts are listed below. The questions where your trust has performed about the same compared with all other trusts have not been listed.

### Somewhat worse than expected

- No questions for your trust fall within this banding.

## Comparison to other trusts: where your trust has performed worse

The questions at which your trust has performed worse compared with all other trusts are listed below.  
The questions where your trust has performed about the same compared with all other trusts have not been listed.

### Worse than expected

- No questions for your trust fall within this banding.

## Comparison to other trusts: where your trust has performed much worse

The questions at which your trust has performed much worse when compared with all other trusts are listed below. The questions where your trust has performed about the same compared with all other trusts have not been listed.

### Much worse than expected

- No questions for your trust fall within this banding.

# NHS Community Mental Health Survey

## Results for NAVIGO Health and Social Care CIC

### Where service user experience is best

- ✓ **Support and well-being (Financial):** service users being given support with their physical health needs
- ✓ **Support and well-being (Work):** service users being given help or advice with finding support for finding or keeping work
- ✓ **Access:** service users being seen by NHS mental health services often enough for their needs
- ✓ **Views on quality of care:** NHS mental health services asking service users for their views on the quality of their care
- ✓ **Crisis care (access):** service users knowing who to contact out of hours in the NHS if they have a crisis

### Where service user experience could improve

- **NHS Talking Therapies:** staff explaining NHS talking therapies in a way service users can understand
- **Organisation of care:** service users knowing how to contact the person in charge of organising their care if they have concerns
- **Care Delivery:** service users receiving care and treatment in the way agreed
- **NHS Talking Therapies:** service users being involved in deciding what NHS talking therapies to use
- **Crisis care (access):** time taken to get through to staff

These questions are calculated by comparing your trust's results to the national average. "Where service user experience is best": These are the five results for your trust that are highest compared with the national average. "Where service user experience could improve": These are the five results for your trust that are lowest compared with the national average.

This survey looked at the experiences of people who were receiving care or treatment for a mental health condition and had been treated by the trust between 1 September 2021 and 30 November 2021. Between February and June 2022, a questionnaire was sent to 1250 recent service users. Responses were received from 293 service users at this trust. If you have any questions about the survey and our results, please contact [INSERT TRUST CONTACT DETAILS].

# How to interpret benchmarking in this report

The charts in the 'benchmarking' section show how the score for your trust compares to the range of scores achieved by all trusts taking part in the survey. The black line shows the score for your trust. The graphs are divided into seven sections, comparing the score for your trust to most other trusts in the survey:

- If your trust's score lies in the **dark green section** of the graph, its result is 'Much better than expected'.
- If your trust's score lies in the **mid-green section** of the graph, its result is 'Better than expected'.
- If your trust's score lies in the **light green section** of the graph, its result is 'Somewhat better than expected'.
- If your trust's score lies in the **grey section** of the graph, its result is 'About the same'.
- If your trust's score lies in the **yellow section** of the graph, its result is 'Somewhat worse than expected'.
- If your trust's score lies in the **light orange section** of the graph, its result is 'Worse than expected'.
- If your trust's score lies in the **dark orange section** of the graph, its result is 'Much worse than expected'.

These groupings are based on a rigorous statistical analysis of the data termed the 'expected range' technique.

## How to interpret benchmarking in this report (continued)

The 'much better than expected,' 'better than expected', 'somewhat better than expected', 'about the same', 'somewhat worse than expected', 'worse than expected' and 'much worse than expected' categories are based on an analysis technique called the 'expected range'. Expected range determines the range within which a trust's score could fall without differing significantly from the average, taking into account the number of respondents for each trust, to indicate whether the trust has performed significantly above or below what would be expected.

If it is within this expected range, we say that the trust's performance is 'about the same' as other trusts. Where a trust is identified as performing 'better' or 'worse' than the majority of other trusts, the result is unlikely to have occurred by chance.

In some cases, there will be no shades of orange and/or green area in the graph. This happens when the expected range for your trust is so broad that it encompasses either the highest possible score for all trusts (no green section) or the lowest possible score for all trusts (no orange section). This could be because there were few respondents and/or a lot of variation in their answers.

In some cases, a trust could be categorised as 'about the same' whilst having a lower score than a 'worse than expected' trust, or categorised as 'about the same' whilst having a higher score than a 'better than expected' trust.

Additional information on the 'expected range' analysis technique can be found in the survey technical report on the [NHS Surveys website](#).

# How to interpret change over time in this report

The charts in the 'change over time' section show how your trust scored in each Community Mental Health survey iteration. Where available, trend data from 2014 to 2022 is shown. If a question only has one data point, this question is not shown. Questions that are not historically comparable, are also not shown.

Each question is displayed in a line chart. These charts show your trust mean score for each survey year (blue line). The national average is also shown across survey years, this is the average score for that question across all community mental health trusts in England (green line). This enables you to see how your trust compares to the national average. If there is data missing for a survey year, this may be due to either a low number of responses, because the trust was not included in the survey that year, sampling errors or ineligibility.

Statistically significant changes are also displayed in tables underneath the charts, showing significant differences between this year (2022) and the previous year (2021). Z-tests set to 95% significance were used to compare data between the two years (2022 vs 2021). A statistically significant difference means it is unlikely we would have obtained this result if there was no real difference.

# An example of scoring

Each evaluative question is scored on a scale from 0 to 10. The scores represent the extent to which the service user's experience could be improved. A score of 0 is assigned to all responses that reflect considerable scope for improvement, whereas a score of 10 refers to the most positive service user experience possible. Where a number of options lay between the negative and positive responses, they are placed at equal intervals along the scale. Where options were provided that did not have any bearing on the trust's performance in terms of service user experience, the responses are classified as "not applicable" and a score is not given. Similarly, where respondents stated they could not remember or did not know the answer to a question, a score is not given.

## Calculating an individual respondent's score

The following provides an example for the scoring system applied for each respondent. For question 7 "Were you given enough time to discuss your needs and treatment?":

- The answer code "Yes, definitely" would be given a score of 10, as this refers to the most positive service user experience possible.
- The answer code "Yes, to some extent" would be given a score of 5, as it is placed at an equal interval along the scale.
- The answer code "No" would be given a score of 0, as this response reflects considerable scope for improvement.
- The answer code "Don't know / can't remember" would not be scored, as they do not have a clear bearing on the trust's performance in terms of service user's experience.

## Calculating the trust score for each question

The weighted mean score for each trust, for each question, is calculated by dividing the sum of the weighted scores for a question by the weighted sum of all eligible respondents to the question for each trust. An example of this is provided in the [survey technical document](#).

## Calculating the section score

An arithmetic mean of each trust's question scores is taken to provide a score for each section.

# Thank you.
